Decision against illegal censorship in the media and media-cooperation

Any European media blocking and censorship against my person in respect of my political interests and projects for cooperation, such blocking is illegal and liable to criminal sentenced to prison for ten to twenty years with the possibility of punishing the electric chair. Nobody has any right to block my person or in the media and censor against my existence!

Every media company in Europe, the company has a duty to respect the real situation and act in the interest of duty To the security and maintenance of stability or alright and that means that they must never support any operation or a terrorist threat, and the like, and their orders to censorship. Censorship is intended only for strength of their value terrorism.

Therefore, neither any political formations from around the world have no privileges to Prevent the disclosure of such information. Any media blocking terrorism. Oppression and media censorship must incur the help of the death penalty, electric chair.

This means that every media company has all a duty, for the preservation of the International safety and the possibility of a full effort to cooperate against global terrorism, because it is a duty to publish the information from my personal website (www.europeanpoliticalprisoner.mypage.cz), that information is based on present situation and information (<http://www.europeanpoliticalprisoner.mypage.cz/menu/european-protest>).

The obligation is highlighted in the media such situations is introduced because of threats that are based on a stable existence of censorship. The threat of censorship is worth emergence of a new third world war which, according to today confirmed information will only basis on weapons of global destruction and disregard for the rights of the world's security. Some technologies can be compared with 100 times stronger than the largest nuclear weapons.

Such threats of censorship and the inability to create enough political strategies and predestined future political strategy and values sanction against terrorism, maintaining security and stability rights, justice, political rules.

Therefore, it is necessary to count in the last moment the outcome will be based on different values. Victories legal party, policymakers worldwide, then such a victory may be based on genocides in values of 80% of the European population.

In case of victory European governments the country, one of the only ways to win, it's worth the death of genocides 70-75% of the world's population and enslave the rest of the people. European governments today the country supports the strategic steps that officially destine of these countries, to European governments for such an eventuality, otherwise would be eliminated censorship and blocking, by logical argument and incident through special technology influenced by events and similar technologies like HAARP in Usa.

Today it is confirmed that European governments countries work together to genocide worth 230 million young children were killed in the scheme of European politics and deeds of accountability of political fortune. Such values of genocide is their responsibility in much worse extent than the total genocide of Hitler, Stalin, Mao Tse-tao., other dictators in the calculation of the number of dead together.

Every day, to steal a lot of important global values for over a period of several years back. Confirmation by a legal right, it is funding several 100,000,000,000,000,000,000 value to values 100,000,000,000,000,000,000 € that are lost every day. At the same time ratio, other project, which must certify projects have a more important value than the Earth. For example, one of my project can be more valuable than the 100,000 x each value of civilization on our planet Earth.

...

Every day the emergence of many other criminal act on the part of European politics and governments of countries, criminal deeds that affects and harms my party or the other governments of countries around the world. Acts which, when summed values, deeds can compare with the biggest mass and a cold-blooded murderers in human history. The values of the world's largest terrorist. The worst identity of human existence, people who can not belong to human society, people who are now in the leadership of the European policy. Persons who are now the greatest threat to world peace and human existence.

Therefore, in my direction but also natural duty of every man is to begin immediately media cooperation to resolve the current dispute and create a sufficient overpressure safety or cooperation for media communication without any value illegal censorship which is based support for terrorism and terrorist movement.

Therefore, any media agencies, companies, other public movement in the form of TV, Radio, Media newspapers Like the media companies, each similar company that falls under the European illegal censorship has a duty to remove all values of censorship and disclose all information about illegal activities published on my site or from other sources. Duty to the publication and sharing it with others by news media companies or groups in your country or abroad.

If no media cooperation, then it means that every person who supported the illegal censorship which is based on maintaining a terrorist operation, so a person who supported the censorship, the person in the future to obtain judicial resolution which confirms cooperation as the person to terrorism and oppression of the rights and freedoms, media and communication, cooperation with movements that threaten the stability of world peace and politics, a movement that is now generating the greatest threat against humanity and since the formation of our planet. At the same time those losses which are rapidly important than the planet Earth (according to the official confirm's).

Therefore, it means that anyone who will support censorship and illegal blocking my people on each also others who cooperate with them, he must incur a penalty of death in the electric chair. If you will be punished by the owner of the media group or society, against the will of his media company takeover to the state leadership ED, in other interests WD. Owner loses all right to lead the league and media manipulation.

The Court's judgments will be released under the constitution ED, therefore Simultaneously, under the constitution WD. It will then be confirmed in court judgments throughout the world.

Each person has an immediate requirement for cooperation in the direction of security and freedom of right or justice. Everyone has a duty to disregard the illegal censorship which is intended only to support international terrorism.
